PROFESSIONAL EXPERIENCE

Bynarc Systems Pvt. Ltd, Intern

Nov 2025 - present

- Worked as a Software Developer Intern, developing and enhancing MIS systems across multiple projects.
- Designed, built, and maintained data-driven modules to support reporting, analytics, and business operations.
- Worked closely with backend logic, databases, API, and structured data flow similar to modern full-stack architectures.
- Analyzed system requirements and user needs to improve performance, scalability, and efficiency.
- Collaborated with team members to develop modular, maintainable, and application-ready software components.

EDUCATION

Bachelor of Engineering, Information Technology

Sinhgad College of Engineering, Pune | CGPA:7.88

2025

RELEVANT PROJECTS

BookXchanger – Book Sale, Purchase & Rental

- Built a hybrid web platform which allowing users to buy, sell, and rent books with role-based access as (Buyer, Seller, Admin).
- Integrated a Flask-based ML model to predict book prices based on multiple features
- Implemented user authentication, product listings, image uploads (AWS S3), and secure transactions.
- Developed an admin dashboard for managing users, listings, and system moderation. Deployed backend on Render with scalable architecture.
- Live: www.bookxchanger.shop

PDF Invoice Generator

- Developed a robust backend service to generate professional, structured PDF invoices with dynamic and optimized.
- Designed database schemas and REST APIs for handling customer and item data efficiently.
- Ensured high-quality report formatting and automated document generation. Implemented error handling, logging, and validation to ensure reliable invoice processing.

Educational Institute Platform

- Architected and developed a production-ready MERN-based educational portal with separate public and admin modules.
- Integrated AWS S3 for secure image/video storage with optimized upload and retrieval workflows. Developed interactive and responsive UI components using React with reusable component architecture
- Implemented efficient data flow between frontend and backend with proper state management and API handling.

SKILLS

Problem Solving	Data Structures and Algorithms
Languages	Java, JavaScript, SQL, HTML, CSS, PHP
Frameworks	Spring Boot, React, JWT, REST API, Node
Tools	Postman, Visual studio Code, Eclipse, Git, Docker, Render
Others	AWS, MySQL, MongoDB, Linux,

CERTIFICATIONS

Postman API Fundamentals Student Expert- Postman
Foundation Course - Edunet Foundation IR 4.0
Introduction to Cybersecurity- Cisco (NetAcad)
